

Special Issue

Molecular Insights into Protein Structure and Folding

Message from the Guest Editor

Protein folding is a crucial aspect of protein function and the protein structure. If the stabilized folding intermediate exists during the folding pathway, the characterization of the intermediate is also essential for estimating the function. This Special Issue welcomes the submission of articles offering an experimental methodology and predictions based on this sequence for the structural analysis of the large protein molecule at the intermediate between unfolded and folded states, kinetics and equilibrium. In order to analyze the folding state, dynamic studies on protein flexibility will be included. In addition, the intrinsically disordered protein will be analyzed in its native state in order to determine the residual structure.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
