News in Skin Diseases: From Basic Mechanisms to Therapies

Message from the Guest Editor

In recent years, advances have been made in the treatment of various inflammatory skin diseases that cause skin lesions, such as psoriasis, atopic dermatitis, and scleroderma. Many biologics targeting inflammatory cytokines and molecularly targeted drugs, such as JAK inhibitors, have emerged. The mechanisms of action and research on these drugs are advancing at a tremendous pace. These treatments are being studied from a variety of perspectives, including not only their therapeutic effect on skin lesions, but also their therapeutic effect on joints and their impact on other complications. In this Special Issue of *IJMS*, we will publish cutting-edge information regarding recent advances in the research of skin diseases from molecular viewpoints. We warmly welcome research and review articles concerning a variety of factors relating to skin diseases, including their genetic/epigenetic regulation, therapy, and prevention.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
