Molecular Pharmacology of Cardiovascular Disease

Message from the Guest Editor

Cardiovascular diseases represent the leading cause of death in developed countries. Although there are numerous types of interventions which aim to educate people in the matters of healthy lifestyle, the large majority of cardiovascular patients require pharmacological management. The increased rhythm of technological advances permits the creation of more efficient and personalized types of pharmacological treatments. In this Special Issue, entitled “Molecular Pharmacology of Cardiovascular Disease”, we want to present papers which deal with the newest research in the field of molecular cardiovascular pharmacology. We welcome reviews and original research papers from fundamental and clinical research addressing issues from all branches of cardiovascular pharmacology.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
