

## Special Issue

# Advances in Novel Therapeutic Strategies for Cancers

### Message from the Guest Editors

Over the past two decades, the precision approach in the treatment of hematological neoplasia and solid cancers has rapidly evolved due to the introduction of several molecular targeted therapies. Even though many crucial nodes whose targeting constitutes a liability for the tumor(s) have been discovered, the need for the development of novel therapeutic strategies is urgent due to the fact that tumors usually adapt to therapy and become resistant.

The scope of this Special Issue involves offering a venue for publishing research about recently emerged or novel promising actionable targets that can be exploited for novel therapeutic strategies for both hematological and solid cancers. In addition, studies on CAR-T and exploitation of the host immunological system against tumors are welcome to be submitted. Finally, given the increasing evidence that the host microbiota is also pivotal in determining the outcome of anticancer therapies, studies on this subject are encouraged. Both basic and translational original research articles and comprehensive reviews are welcome to be submitted.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
