

## Special Issue

# Gastrointestinal: Inflammation, Immunity and Cancer Pathways

### Message from the Guest Editor

Cancer is a major problem of disease worldwide and each year, more than millions of people are detected with cancer around the world, and more than half of them die. Gastrointestinal cancers are among the highest death causing cancers in the world. The incidence of these cancers were an estimated 4.8 million cases and 3.4 million deaths worldwide.

Gastrointestinal cancer is a group of cancers that affect the gastrointestinal tract. Gastrointestinal cancer include esophageal, stomach, gallbladder, gastrointestinal stromal tumor, liver, pancreatic, colon, rectal and anal cancer. Through this Special Issue “Gastrointestinal: Inflammation, Immunity and Cancer Pathways” we aim to highlight the new discoveries and advances in the mechanism, diagnosis, prevention, and treatment in gastrointestinal cancer molecular biology.

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
