

## Special Issue

# Molecular Researches in Soft Tissue Sarcomas

### Message from the Guest Editors

In this issue, we look to see how our improved understanding of the genetic, transcriptomic and epigenetic changes of sarcomas can lead to the identification of potential therapeutic windows of opportunity, and enhance a personalized medicine approach. We seek submissions confirming or identifying novel subtype-specific abnormalities based on molecular investigations or profiling that may offer potential as biomarkers, or identification of targets for intervention. We are also interested in studies exploring the effect of targeted interventions, either for sarcomas as a group, or subtype-specific. Exploration of biological actionable traits, such as proliferation migration, invasion, metastasis and the targeting of stem cells with their associated molecular backgrounds in vitro and in vivo are also of interest.

---

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
