Molecular Applications of Deep Learning in Kidney Diseases

Message from the Guest Editors

Deep learning is gaining momentum in the context of nephrology research. Deep learning tools have shown usefulness in improving the comprehension of molecular mechanisms underlying the risk of kidney disease and the prediction of future events and response to therapies. The aim of this Special Issue is to collect data and articles that, considered together, may help researchers and physicians to improve the current and future applications of deep learning for research on kidney disease.

Guest Editors

Dr. Michele Provenzano
Prof. Dr. Vincenzo Pezzi
Prof. Dr. Gianluigi Zaza

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
