## Molecular Research in Renal Endocrinology

## Message from the Guest Editor

The complex interplay between the kidneys and the endocrine system plays an important role in renal physiology and overall body physiology, as well as in the pathophysiology of various diseases. Understanding these mechanisms is crucial for developing successful therapeutic approaches for various renal conditions. including chronic and acute kidney failure, glomerulonephritis, disturbances in blood pressure and fluid balance regulation, various bone and mineral metabolism diseases, and obesity. New studies on the molecular mechanisms in renal endocrinology are necessary for the development of innovative therapeutic approaches aimed at restoring hormonal balance and preventing the progression of kidney disease. By utilizing advanced technologies such as gene editing, genomics, proteomics, and various in vivo or in vitro model systems, we can provide new innovative tools for studying these mechanisms. We invite researchers to contribute to this Special Issue by sharing their original articles and review papers related to different aspects of renal endocrinology.

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

#### **Editor-in-Chief**

#### Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences, Sez-Biochimica, Faculty of Medicine, Università Politecnica delle Marche, Via Ranieri 65, 60100 Ancona, Italy

#### **Author Benefits**

#### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
