

## Special Issue

# Advances in Cell Signaling via Proteolysis

### Message from the Guest Editors

Cell signaling and proteolysis are interconnected processes that regulate and influence each other. The precise coordination between these processes is crucial for maintaining cellular homeostasis, normal physiological functions and the prevention of disease. Understanding the intricate relationship between cell signaling and proteolysis provides valuable insights into the complexity of cellular processes and offers potential therapeutic targets for various diseases. This Special Issue focuses on the research field of the proteolysis, and welcomes original research articles, short communications and reviews, both narrative and systematic.

---

### Guest Editors

Dr. Hoi Leong Xavier Wong

Dr. Kui Ming Chan

Prof. Dr. Satoshi Kametaka

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
