Modulation of the Immune System and Oxidative Stress in Liver Illnesses

Message from the Guest Editors

The regulation of the immune system and oxidative stress plays a direct role in liver disorders. However, they are not solely engaged in processes linked to harm. Oxidative stress is linked to the redox state and plays a significant role in various physiological processes, including cellular signaling adaptations and the hypothalamic regulation of hunger. Inflammatory mediators play a crucial role in the mechanisms involved in liver diseases. Nevertheless, when these two events are no longer subject to regulations, their impact becomes detrimental. Within this Special Issue, we hope to cover all the immunoregulatory mechanisms involved in liver disease and the best approaches and timing to prevent inflammation and oxidative stress.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
