

Special Issue

Progress in Molecular Research of Reproductive Biology and Related Diseases

Message from the Guest Editor

We are pleased to introduce the Special Issue "Progress in Molecular Research of Reproductive Biology and Related Diseases." This Special Issue aims to highlight cutting-edge research that deepens our molecular insight into both normal and pathological reproductive processes. We welcome studies that investigate gene expression, signaling pathways, epigenetic regulation, hormonal cross-talk, cellular interactions, and molecular responses within reproductive tissues across developmental stages. Submissions may focus on female or male reproduction, including ovarian, uterine, placental, testicular, and embryonic biology; gametogenesis; fertilization; embryo–maternal communication; and molecular bases of reproductive diseases. Importantly, contributions must present results at the molecular level. Both original research articles (in vitro and in vivo) and comprehensive reviews are welcome. We look forward to receiving your valuable contributions.

Guest Editor

Dr. Anna Nynca

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
