New Insights into Network Pharmacology

Message from the Guest Editor

Network pharmacology has recently emerged as a powerful framework for elucidating the molecular mechanisms underlying traditional medicine. Network pharmacology serves as a bridge between natural product research and modern drug discovery by enabling the identification of bioactive compounds, target genes, and signaling pathways that contribute to therapeutic effects. Traditional medicine, with its complex formulations and multi-target characteristics, provides an invaluable resource for discovering novel pharmacological mechanisms and potential therapeutic candidates. This Special Issue aims to gather original research articles and comprehensive reviews that explore the molecular basis of traditional medicine. Studies focusing on in vitro and in vivo models, mechanistic insights, and molecular validation of natural compounds are especially encouraged. Submissions that combine clinical or pre-clinical model-based investigations with biomolecular experiments are particularly welcome.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
