

## Special Issue

# Mechanism(s) of HFpEF and HFrEF

### Message from the Guest Editor

HFpEF by multiple hits, i.e., obesity/fat, hypertension, aging, hyperlipidemia, and others, is a need of ailing myocardium to mitigate failing hearts. Therefore, to deconvolute the mechanism of HFpEF, it is important to compare with single hit, such as high fat diet (HFD)-induced HFpEF versus two-hit and three-hit models of HFpEF. Also, it is important to compare with failing HFrEF. We should also use some treatment stages such as changes in gut microbiome by dysbiosis diet, which changes the ratio of good versus bad microbiota in the gut, which leads to cardiac dysfunction. Dysbiosis causes epigenetic alterations in DNA methylation, creating hyperhomocysteinemia (HHcy) unequivocally. This Special Issue aims to focus on the mechanism of HFD-induced HFpEF and compare it with HFrEF.

### Guest Editor

Prof. Dr. Suresh C. Tyagi

Department of Physiology, University of Louisville School of Medicine, Louisville, KY 40202, USA

### Deadline for manuscript submissions

closed (20 November 2025)

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
