

# Special Issue

## Advances on Retinal Diseases

### Message from the Guest Editor

Aging, drug side-effects, immune-system disorders, and genetic mutations affect the cells and tissues of the retina and optic nerve, which often cause poor vision and lead to poor quality of life. In this Special Issue, we welcome researchers and clinicians to contribute their original research and review articles describing in vitro and/or in vivo data. The following topics are particularly welcome:

- The potential effect of genetic mutations, aging, and drug side effects on eye diseases, including studies on novel mutations/biomarkers and signaling pathways.
- Novel technologies, such as electrophysiology, spectral domain optical coherence tomography, optical coherence tomography angiography, artificial intelligence, clinical molecular genetic tests, etc., for diagnosis and monitoring of those eye diseases in the aspects of functional, morphological, and molecular characterization.
- Therapeutic interventions for eye diseases, including drug, surgery, stem cell, cell, and gene therapies.

---

### Guest Editor

Dr. Minzhong Yu

1. Department of Ophthalmology, Cleveland Clinic Lerner College of Medicine of Case Western Reserve University, Cleveland, OH 44195 USA

2. Department of Ophthalmology and Visual Sciences, University Hospitals Eye Institute, Case Western Reserve University, Cleveland, OH 44106, USA

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
