Molecular Mechanisms and Treatment in Skin Cancer

Message from the Guest Editor

In the U.S., more than 9,500 people are diagnosed with skin cancer every day. The annual cost of treating skin cancers in the U.S. is estimated at 8.1 billion. The Special Issue “Molecular Mechanisms and Treatment in Skin Cancer” aims to stimulate comprehensive research relating to skin cancer. This Issue will accept articles on the pathophysiology of skin cancer and its aetiologies, molecular basis, and therapy, including pharmacological and non-pharmacological treatment. This special issue aims to focus on basic science, and translational research, as well as clinical evidence, to fully understand the pathophysiology of skin cancer, considering all aspects of this complex puzzle.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
