Molecular Advances in Primary Colorectal Cancer and Liver Metastases

Message from the Guest Editor

Colorectal cancer (CRC) is the third most common type of carcinoma worldwide, with more than 1.9 million cases diagnosed during 2022. CRC is ranked as the second most common cause of cancer death, leading to more than 900,000 deaths per year, according to the World Health Organization (WHO). In 2020, CRC accounted for 10% of global cancer incidence and 9.4% of cancer deaths, with the worldwide prediction of 3.2 million new CRC cases arising in 2040. The scope of this issue will include research on metastatic CRC patients and the latest advances in screening and diagnostic measures (molecular profiling, genetic and epigenetic alterations), as well as elaboration on the therapeutic advances and management. We are particularly interested in papers that bring light to long-lasting questions, highlight important issues, and report unexpected findings to the scientific and medical world. We are particularly interested in studies with a molecular basis, as the *International Journal of Molecular Sciences* is a journal of molecular science; pure clinical studies will not be suitable for our journal.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
