Plant Tolerance to Stress

Message from the Guest Editor

Dear Colleague, Plants are increasingly threatened by climate change, heavy metal pollution, soil salinization, and the spread of pests and diseases. Increasing tolerance of crop plants to stresses is needed to fulfill increased food needs of the population. The application of various phytoprotectants has become one of the most effective approaches in enhancing the tolerance of plants to these stresses. This Special Issue will explore the genetic and molecular mechanisms of plant stress tolerance traits, aiming to identify innovative breeding strategies that can enhance their resilience to environmental stresses. We also welcome original research articles and reviews in this field. Dr. Li Xingguo

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
