

Special Issue

Structural and Functional Insights into Membrane Transporters: A Tribute to Dr. Ernest Wright

Message from the Guest Editor

This Special Issue will commemorate the outstanding career of Dr. Ernest Wright, who has recently retired. Dr. Wright, a member of both the Royal Society and the National Academy of Sciences, is renowned for his pioneering contributions to the field of membrane transport, particularly in the cloning and characterization of sodium-glucose co-transporters (SGLTs). His groundbreaking discoveries have shaped our understanding of glucose transport and its implications for human health, laying the foundation for therapeutic advances in diabetes and cancer treatment. This Special Issue will take a broader approach to membrane transporters, examining various classes of transporters and exploring their structural and functional relationships, as well as their roles in health and disease. By bringing together cutting-edge research, this Special Issue will provide a comprehensive overview of how membrane transporters contribute to cellular function and how their dysfunction can lead to disease. It is our honor to celebrate Dr. Wright's illustrious career with this collection of studies, which will also inspire future research in the field of membrane transport.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
