

## Special Issue

# New Advances in Autoimmune Diseases

### Message from the Guest Editor

Autoimmune diseases, which develop as a result of immune system dysregulation, are a significant health challenge. This Special Issue aims to gather cutting-edge research on the molecular pathways, genetic and epigenetic factors, immune signalling, and novel molecular biomarkers involved in autoimmunity. We welcome submissions that explore these molecular aspects, providing insights into the pathogenesis of disease and potential therapeutic targets. By focusing on the molecular mechanisms, this Special Issue seeks to advance our understanding of autoimmune diseases and inspire innovative approaches to treatment and diagnosis, offering hope for the development of new more effective treatments.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
