

## Special Issue

# Drought Stress Tolerance in Plants in 2024

### Message from the Guest Editor

This issue of the *International Journal of Molecular Sciences* journal will focus on recent advances in mechanisms involved in drought tolerance in crop plants, with special attention paid to the role of the root tissue, shoot–root interactions, and photosynthetic function. In addition to drought, it will consider other abiotic stresses involving water deficits, like soil salinization, at the cell level and their interaction with drought.

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
