

## Special Issue

# Molecular Insights in Hepatic Disease and Hepatocellular Carcinoma

### Message from the Guest Editors

The field of hepatology has witnessed remarkable research and revolutionary developments in recent years. Particularly in the treatment of advanced hepatocellular carcinoma (HCC), the widespread use of immune checkpoint inhibitors presents the potential to extend treatment efficacy to early and intermediate stages of HCC. In the field of viral hepatitis, significant progress has been marked by the use of high-potency nucleos(t)ide analogues. Additionally, several clinical trials are implementing new drug combinations aimed at achieving an HBV cure. Additionally, in the realm of fatty liver disease, a new term—metabolic dysfunction-associated steatotic liver disease—has been introduced, with numerous promising drugs currently undergoing clinical trials. In alignment with these revolutionary strides, this Special Issue aims to provide an overview of molecular insights in hepatic diseases and hepatocellular carcinoma. It will encompass various basic and translational research related to a spectrum of hepatic disorders. We therefore invite you to submit research and review papers to this Special Issue.

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
