Molecular Targets in Gastrointestinal Diseases

Message from the Guest Editor

This Special Issue, entitled “Molecular Targets in Gastrointestinal Diseases”, invites researchers to explore and submit their latest findings on the molecular underpinnings of gastrointestinal (GI) diseases. This Special Issue aims to highlight the critical molecular mechanisms and targets that drive the pathology of a wide range of GI conditions, including inflammatory diseases, carcinomas, metabolic disorders, and functional gastrointestinal disorders.

Understanding the molecular targets in GI diseases is crucial for the development of innovative therapeutic strategies. This includes the identification of key signaling pathways, genetic mutations, epigenetic modifications, and protein interactions that contribute to disease onset and progression. By elucidating these molecular mechanisms, researchers will be able to pave the way for targeted therapies that offer improved efficacy and reduced side effects compared to traditional treatments.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
