

# Special Issue

## Emerging Heterocycles

### Message from the Guest Editors

Heterocycles are abundant in nature and play important roles in all aspects of life. The synthesis of natural and unnatural heterocyclic molecules is becoming increasingly significant as new scaffolds are required to overcome the increasing problems of drug resistance. Heterocycles are also key building blocks for the construction of the next generation of materials. The scope of this Special Issue is intentionally broad and inclusive and encompasses any type of paper (review, original paper, communication, perspective paper) regarding structural and/or functional studies, reactions, and applications of heterocycles and their biological activity and biosynthesis. In addition, new methodological approaches are the topics to focus on.

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
