Molecular Mechanisms and Therapies of Oral Cancer

Message from the Guest Editor

Oral cancer is the most prevalent head and neck cancer, posing a significant challenge to public health. And though there is a lot of research about it. However, the development of oral cancer encompasses a myriad of complex molecules and pathways, with many unresolved problems in treatment failures.

This Special Issue provides a platform to showcase your findings and contribute to advancing our understanding and management of oral cancer. Potential topics of interest include but are not limited to identifying molecules and pathways involved in oral cancer progression for developing novel therapeutic targets; precise and personalized treatment strategies; biomarkers for early detection, diagnosis, and prognosis; preclinical and clinical studies evaluating the efficacy of therapeutic interventions; advancing in imaging techniques for oral cancer detection and monitoring. We encourage you to contribute original research articles or reviews to this Special Issue. Your work will undergo assessment and be included in the peer review process.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
