

Special Issue

Novel Approaches for Tissue Repair and Tissue Regeneration

Message from the Guest Editor

Tissue repair and regeneration represent both critical and complex challenges in modern medicine. As the field continues to advance, there is a growing body of evidence supporting the potential of biomaterials and stem cells in facilitating tissue reconstruction and promoting regenerative processes. However, despite these promising developments, existing therapeutic strategies remain suboptimal, often falling short in fully addressing the intricate needs of tissue repair. To overcome these limitations, there is an urgent need for novel and innovative approaches that focus on enhancing the structural, biochemical, and mechanical properties of biomaterial scaffolds. These improvements are essential to better support the complex requirements of tissue growth, functional restoration, and integration within the body. Given these considerations, the current Special Issue seeks to invite research articles that explore emerging trends, cutting-edge methodologies, and new insights in the field of tissue engineering and regenerative medicine.

Guest Editor

Dr. Srinivas Madduri

Bioengineering and Neuroregeneration Laboratory, Department of Surgery, University of Geneva, 1211 Geneva, Switzerland

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
