We are delighted to announce that the Special Issue entitled “Metallopharmaceuticals: Current Trends and Future Perspectives in Cancer Immunoediting” is now open to receiving paper submissions. Topics of interest for this Special Issue include, but are not limited to, the following:

- Chemistry of metal-based anticancer drugs;
- Synthesis/improvement of metal-based complexes;
- Uptake, toxicity, and resistance of metal-based anticancer agents;
- Nanosystem delivery of metal-based complexes;
- Mechanisms of action and biological targets of metal-based complexes;
- Effects of metal-based compounds on the activation of innate immunity with inflammasome-mediated responses;
- Combination immune checkpoint therapy;
- Interactions of metal-based complexes with immune checkpoints and/or proteins.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
