## **Special Issue**

## Roles of Inflammasomes in Inflammatory Responses and Human Diseases

## Message from the Guest Editor

Inflammation is an innate immune defense that protects our body tissues from pathogens and cellular dangers; however, repeated and prolonged inflammation known as chronic inflammation has been considered as a key risk factor for a variety of human diseases. The inflammasome activation has been regarded as a key determinant for the induction of inflammatory responses and the progression of various human diseases, and the inhibition of inflammatory responses by selective targeting of inflammasomes has been suggested as a promising strategy to develop novel therapeutics for the treatment of these human diseases. However, the roles of inflammasomes and their dysregulation during inflammatory responses and human diseases are still largely unknown and remain to be investigated. This Special Issue welcomes studies exploring but not limited to the "Roles of Inflammasomes in Inflammatory Responses and Human Diseases", identifying and validating novel targets regulating inflammasome functions, evaluating anti-inflammatory effects by targeting inflammasomes, and developing potential inflammasome-targeted therapeutics.

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

#### **Editor-in-Chief**

#### Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences, Sez-Biochimica, Faculty of Medicine, Università Politecnica delle Marche, Via Ranieri 65, 60100 Ancona, Italy

#### **Author Benefits**

### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
