Complications of Pregnancy: The Importance of Omics- Based Diagnosis and Therapeutic Approaches

Message from the Guest Editor

Pregnancy complications are physical or mental medical conditions that affect the health of pregnant or post-partum women, their babies, or both. Complications may arise from preexisting conditions or may first develop during pregnancy. Early detection and timely treatment can help reduce the risk of serious outcomes. Most medications are not tested for use during pregnancy, and health care providers may decide to treat the condition with available medications or not to treat it at all, depending on the benefit/risk factor. Prevention, early detection, and new alternative therapies based. Thus, this Special Issue of the International Journal of Molecular Sciences aims to bring together high-quality articles that address different areas within pregnancy complications. We welcome all researchers working on prevention, diagnosis, and therapies for different pregnancy conditions to contribute with in-depth critical reviews and original articles. Contributions from international investigators will provide a comprehensive state-of-the-art analysis of pregnancy complications to help implement better prevention and management strategies.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
