

## Special Issue

# 3D Printing in Pharmaceutical Drug Delivery

### Message from the Guest Editors

This Special Issue features contributions highlighting recent advancements, technical innovations, and the practicality of 3D printing in pharmaceutical formulation and drug delivery. We invite original research or review articles examining process optimization, material selection, characterization techniques, and clinical implications, offering a thorough overview of 3DP's influence on contemporary pharmaceutical research.

Keywords:

- personalized medication
- 3-dimensional printing
- solubility and bioavailability enhancement
- polymers for 3D printing
- bio-inks
- 3D-printed implants
- additive manufacturing

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
