Special Issue

Molecular Advances in Mental Disorders

Message from the Guest Editor

This special issue, "Molecular Advances in Mental Disorder" delves into the latest scientific breakthroughs that are reshaping our understanding of mental health conditions at the molecular level. The issue will include a wide range of topics- genetic and epigenetic insights. neurotransmitter systems, biomarker for early diagnosis, molecular therapeutics, neuroinflammation and immune response and finally neural circuit and synaptic plasticity. The convergence of molecular biology and mental health research holds promise for transforming the diagnosis and treatment of mental disorders. This special issue underscores the importance of interdisciplinary collaboration and continued investment in molecular research to unravel the complexities of mental health conditions. By advancing our molecular understanding, we move closer to a future where mental disorders can be managed with greater precision and efficacy, "Molecular Advances in Mental Disorders" offers a comprehensive overview of the state-of-the-art research in this rapidly evolving field.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences, Sez-Biochimica, Faculty of Medicine, Università Politecnica delle Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
