The Role of Cannabinoids in Human Health and Disorder

Message from the Guest Editors

Cannabinoid receptors, endocannabinoids, and the enzymes responsible for their biosynthesis and degradation constitute the endocannabinoid system (ECS). The ECS controls many basic biological processes, exerting its activity in the nervous system and in peripheral tissues, with direct involvement in synaptic plasticity and neuroprotection, pain control, stress response, reproduction, food intake and energy balance, immune response, and cancer progression. As a result, ECS impairment has been reported in several diseases, and its modulation currently represents a possible therapeutic strategy for the treatment of numerous pathological conditions, including neurological diseases, mental and behavioral disorders, pain, inflammation, osteoporosis, cardiovascular disorders, obesity and cancer. Considering the importance of the ECS and the therapeutic potential of cannabinoids in this vast number of medical conditions, numerous ECS synthetic modulators have been developed over the past two decades, and several clinical studies are currently ongoing.

Guest Editors

Prof. Dr. Grazia Chiellini

Department of Pathology, University of Pisa, 56100 Pisa, Italy

Dr. Beatrice Polini

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
