Understanding of Structure-to-Function Relationships in Biological Macromolecules

Message from the Guest Editor

Integrative structural biology (ISB), one of the key fields of modern life science, has become a powerful approach to determine the structural data of biological macromolecules. Elucidating such data for natural macromolecules contributes to solutions to biomedical and biotechnological tasks, such as structure-assisted drug design and the development and optimization of novel biocatalysts. ISB combines various modern complementary experimental techniques, including X-ray crystallography, NMR spectroscopy, electron microscopy, and SAXS/SANS, as well as computational methods, to generate complete structural models. This Special Issue focuses on recent studies that aim to investigate macromolecular structures using a combination of structural biology methods. The special aim of this Special Issue is to address structure-to-function relationships among various biologically important molecules including relevant protein–protein and protein–ligand complexes. Original research studies providing such information are welcomed.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
