New Insights in Plant Abiotic Stress

Message from the Guest Editor

Abiotic stresses, such as heat, cold, high salinity, heavy metals, and ultraviolet radiation, are hostile to plant growth and development, leading to great crop yield losses worldwide. It is necessary to develop new methods, tools, and equipment to predict the changes that could be caused by abiotic stresses at the current time. This will make it possible to reduce production losses and increase crop tolerance. *IJMS* has organized a series of Special Issues to highlight the latest advancements in science in order to be at the forefront of different fields of research. This editorial initiative of particular relevance, led by Dr. Bernie Wone, is focused on new insights, novel developments, current challenges, latest discoveries, recent advances, and future perspectives in the field of plant abiotic stress. The present Special Issue, entitled “New Insights in Plant Abiotic Stress”, aims to present recent research developments to the wider community involved in this field. We welcome contributions in this field.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
