The Pathogenesis and Therapy of Endometriosis

Message from the Guest Editors

There are several limitations to the diagnosis of endometriosis, including a delay in diagnosis, dependence on surgical intervention (a definitive diagnosis of endometriosis often requires surgery), lack of standardization in required imaging and its interpretation, variation in symptoms and lack of pathognomonic biomarkers. This may all be due to the still limited knowledge of the pathogenesis of endometriosis. The actual pathogenesis of the pathology remains mysterious to this day, and there are no indicators to prevent the evolution of this condition or to account for the heterogeneity with which the pathology manifests itself. Likewise, we have few tools to measure a response to medical treatment. Finally, technological advances make treating this pathology increasingly less invasive and more effective, uncovering differences between approaches that deserve to be investigated further. Our Special Issue was created to present the latest findings in these areas. Therefore, we invite our authors to contribute their most essential testimonials in terms of case reports, original articles, review articles, and meta-analyses.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
