

Special Issue

Advances in Sphingolipid Biology: Implications for Cellular Signaling and Immune Response

Message from the Guest Editor

This Special Issue invites manuscripts that focus on the sphingolipid role in cellular signaling and immune responses in a cell-specific manner. The profiles of sphingolipid-interacting proteins and other lipids in cellular membranes of different types of immune cells are poorly characterized. Therefore, manuscripts that derive from multidisciplinary efforts to reveal the molecular mechanisms of the sphingolipid role in pathophysiological conditions or in cellular defense against invading pathogens are especially welcome.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
