Special Issue

Synthesis and Activity Studies of Anticancer Compounds

Message from the Guest Editor

The versatility of factors that can influence the outcome of oncological treatment, e.g., time of detection, the nature of cancer cells, genetic mutations, and the patient's health condition, positions malignant tumours as the leading cause of death worldwide. The search for potent, selective, and clinically promising anticancer agents is one of the most active areas in medicinal chemistry and pharmaceutical science. Efforts are undertaken to construct structurally diverse scaffolds (e.g., small molecules, natural product derivatives, and metal complexes), evaluate the structure-activity relationship, to identify how specific functional groups or stereochemistry influence cytotoxicity, and explore the specific mechanisms of action including targets and pathways, such as apoptosis induction, cell-cycle regulation, kinase inhibition, and modulation of redox balance. This Special Issue is supervised by and assisted by Dr. Magdalena Obieziurska-Fabisiak. This Special Issue aims at highlighting recent advances in the design, chemical modification, and biological evaluation of molecules that may serve as potential next-generation chemotherapeutics.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences, Sez-Biochimica, Faculty of Medicine, Università Politecnica delle Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
