

Special Issue

Pharmacology of Neuropathic and Inflammatory Pain

Message from the Guest Editors

Neuropathic and inflammatory pain are widespread chronic conditions, yet current treatment remains inadequate. This Special Issue invites high-quality research on the pharmacology of pain, covering molecular targets, signaling pathways, ion channels, neuroimmune interactions, and translational models. We particularly welcome studies on natural and synthetic compounds, drug repurposing, biomarkers, and omics approaches, as well as research on diabetic neuropathy, neuroinflammation, sex differences, and precision pain medicine. The issue aims to provide a multidisciplinary platform to advance understanding and therapeutic development for neuropathic and inflammatory pain.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Inorganic Chemistry)
