

Special Issue

Natural Compounds for Skeletal Muscle Health and Regeneration

Message from the Guest Editor

The skeletal muscle system is critical to movement, metabolism, and overall health. However, muscle degeneration and impaired regeneration, whether caused by aging, disease, or injury, present significant healthcare challenges. This Special Issue will delve deeply into the molecular mechanisms by which natural compounds can promote skeletal muscle health and regeneration. We particularly encourage research into the molecular pathways that drive muscle regeneration, regulate protein synthesis, influence mitochondrial function, and remodel the extracellular matrix. Research into bioactive compounds and their effects on key signaling pathways involved in muscle degeneration, inflammation, and repair is greatly appreciated. Contributions that unravel the mechanistic actions of naturally derived molecules in combating muscle-related diseases, such as sarcopenia and atrophy, will be precious.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
