Multiple Myeloma: Molecular Mechanism and Targeted Therapy

Message from the Guest Editors

Multiple myeloma (MM) is a plasma cell disorder characterised by bone marrow infiltration with clonal plasma cells, which secrete monoclonal immunoglobulin detectable in serum and/or urine. The development of novel targeted therapies has markedly improved the response rate and survival outcome, but MM still remains incurable. While novel agents have improved treatment outcomes, identification of biomarkers that will facilitate clinicians in determining which treatment is optimum is a crucial area in the clinical management of MM. The availability of predictive biomarkers would be useful in avoiding ineffective treatments and allow for the administration of alternative regimens which are continuing to be approved for the treatment of MM. In this Special Issue, we welcome contributions to all aspects of pathobiology, symptoms, diagnostic tools and biomarker development, and novel treatment options of MM.

Guest Editors

Dr. Despina Bazou

Department of Haematology, Mater Misericordiae University Hospital, D07 KH4C Dublin, Ireland

Dr. Paul Dowling

Department of Biology, Maynooth University, W23 F2H6 Maynooth, Ireland

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
