Molecular Insight into Leukemia

Message from the Guest Editors

Leukemias constitute a group of life-threatening malignant disorders of the blood and bone marrow. Over 500,000 patients are diagnosed with these conditions each year. Therefore, understanding the molecular bases underlying these diseases and developing biomarkers that control the occurrence of normal hematopoietic and leukemia will help us to develop more appropriate and effective treatment measures. The aim of this Special Issue, entitled “Molecular Insight into Leukemia” is to provide an updated overview of the current knowledge of the pathogenesis and novel therapies of leukemias. Studies about the biological basis, new therapeutic strategies, treatment resistance, prognostic and diagnostic biomarkers of leukemias are welcomed.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
