Toxicology Research: Understanding and Predicting Compound-Induced Toxicity

Message from the Guest Editor

Mechanistic toxicology has evolved into a more integrative vision, moving beyond isolated molecular or cellular events to a broader understanding of toxicity across biological levels in accordance with a systems perspective. The framework involving adverse-outcome pathways plays a central role in this shift, offering a sequentially organized level of biological associations, with a molecular initiating event triggering a series of key events and an observable adverse outcome at the individual or population level. This framework supports the advancement of next-generation risk assessment and new approach methodologies, which include in silico, in vitro, and non-mammalian in vivo tools. Together, these approaches aim to improve toxicity testing, enabling the identification of early and key effect biomarkers for the better protection of human health. In this Special Issue, we aim to highlight recent progress in the application of adverse-outcome pathway to predictive toxicology, emphasizing mechanistic insight and innovation across emerging and traditional toxicological platforms.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
