

## Special Issue

# Molecular Mechanisms of Vascular Sclerosis

### Message from the Guest Editor

Various biochemical pathways activated under diabetes and dyslipidemia can accelerate the progression of atherosclerosis and macrovascular complication, such as coronary heart disease, peripheral heart disease, and stroke. It is important to reveal the mechanisms of early characteristic features of atherosclerosis, which plays a crucial role in the development and progression of atherosclerotic cardiovascular disease. For this Special Issue, we invite original research articles, reviews, rare case reports, and literature reviews addressing recent advances in the molecular mechanisms of atherosclerosis in humans and animals.

### Guest Editor

Dr. Michishige Terasaki

Department of Medicine, Division of Diabetes, Metabolism, and Endocrinology, Showa University School of Medicine, 1-5-8 Hatanodai, Shinagawa-ku, Tokyo 142-0064, Japan

### Deadline for manuscript submissions

closed (20 August 2026)

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Inorganic Chemistry)
