Long History of Snake Toxins: The 60th Anniversary of the α - Bungarotoxin Discovery

Message from the Guest Editor

In 1963, Chang and Lee published their paper that described the isolation of several neurotoxins from the venom of the multi-banded krait *Bungarus multicinctus*. Among the isolated toxins was α -bungarotoxin. This toxin laid the foundation for the discovery of an entire family of proteins, which is now called the Ly6/uPAR family. This year not only commemorates the 60th anniversary of the α -bungartoxin discovery, but it is also the 50th anniversary of the research on animal toxins at the Shemyakin-Ovchinnikov Institute of Bioorganic Chemistry Russian Academy of Sciences. The first paper that described the amino acid sequence of neurotoxins from cobra venom determined at than Shemyakin Institute of Chemistry of Natural Products USSR Academy of Sciences was published in 1973. A variety of works devoted to various aspects of the study of toxins have been published by the Institute. Original research papers and comprehensive reviews that report discoveries, structure elucidation and biological activity studies of animal toxins are welcome. Historical essays in toxinology will also be considered.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
