

## Special Issue

# Molecular Imaging for Cancer Theranostics

### Message from the Guest Editors

This Special Issue focuses on recent advancements in molecular imaging and theranostics in cancer research. With the advancement of precision medicine, molecular imaging techniques have enabled cancer visualization at cellular and molecular levels, allowing for earlier and more accurate diagnosis. Additionally, theranostic approaches combine diagnostic and therapeutic strategies to target cancer more effectively, opening new avenues for personalized treatment. Contributions addressing novel imaging agents, molecular probes, multimodal imaging, and targeted therapy approaches are particularly welcome.

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
