

Special Issue

Molecular Insights into *Streptococcus pneumoniae*

Message from the Guest Editor

This Special Issue will cover all aspects of pneumococcal biology. We welcome submissions on topics such as host–pathogen interactions, superinfection with other microbiome members, vaccination, carbohydrate utilization, cell envelope synthesis and genome evolution. Studies that involve discovering a new biological process and reviews that summarize an emerging field are particularly welcomed. Our goal is to conglomerate the recent advancements in the field to stimulate new thoughts and ideas.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
