Advances in Allergen Immunotherapy: Current Concepts and Future Directions

Message from the Guest Editor

Allergen immunotherapy remains the only causative treatment currently available for allergic diseases. Further innovations in molecular allergology, alternative administration routes (such as intralymphatic and epicutaneous immunotherapy), depot formulations, novel adjuvants, and updated protocols, along with randomized controlled trials used to rigorously evaluate immunotherapy products, have significantly expanded the therapeutic landscape. Substantial advances have also been achieved in venom immunotherapy.

This Special Issue aims to collect high-quality reviews and original research articles on advances in allergen immunotherapy in both children and adults. We welcome contributions that address all types of immunotherapy and routes, novel protocols, clinical trials, and emerging safety and efficacy considerations. Immunological studies exploring the humoral and cellular mechanisms of immunotherapy are also highly encouraged.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
