Molecular Signaling and Cellular Mechanisms in Asthma

Message from the Guest Editor

Asthma is a heterogeneous and complex immune inflammatory condition affected by several environmental and pathophysiological conditions. Due to the emergence of more complex and varied endotypes and phenotypes of asthma, there is an unmet need to study and understand the molecular mechanism involved in various endotypes of this allergic condition. In this Special Issue, we want to accommodate a wide variety of original research deciphering the molecular mechanism and cell types involved in various asthma endotypes as well as the review articles summarizing the progress made in this field in recent years.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
