# Emerging Insights into the Pathobiology and Biomarkers of Traumatic Brain Injury (TBI)

### Message from the Guest Editor

This Special Issue, *Emerging Insights into the Pathobiology and Biomarkers of Traumatic Brain Injury (TBI)*, will bring together cutting-edge research and perspectives from molecular biology, neuroimmunology, neurodegeneration, and clinical sciences. We welcome contributions that explore the mechanisms underlying neuronal and glial injury, neuroinflammation, axonal degeneration, and neurovascular disruption, as well as studies that identify and validate biomarkers with translational potential for predicting outcomes, monitoring recovery, and guiding therapeutic development.
