Advances in Autoimmune Diseases: The Molecular Basis and New Therapies

Message from the Guest Editor

This Special Issue highlights the molecular underpinnings of autoimmunity and explores the latest therapeutic innovations, underscoring the shift from broad immunosuppression to personalized, mechanism-based interventions. Continued translational research and robust clinical trials are essential to realizing the full potential of these emerging therapies and to addressing unmet needs in autoimmune disease management.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
