Recent Advances of Natural Products in Chemical and Biological Aspects

Message from the Guest Editors

Products of natural origin are derived from plants, minerals, animals, or microorganisms. Nature has been a source of active ingredients, from ancient times to the present day. In addition, there is currently a tendency to use this type of more natural substances. Natural products, especially those from plants, have attracted significant interest since their composition contains compounds with interesting bioactive properties for health. It is therefore essential to understand and explore the chemical composition of these natural products in order to be able to elucidate the molecules responsible for biological activity. In addition, it is also important to know the interactions of cellular molecules that carry out the biological processes essential for the cell's functions and maintenance. We are pleased to invite you to present original research and review articles on new advancements in the development and application of natural products. This Special Issue aims to contribute to the knowledge of different substances of natural origin in their chemical composition and potential biological activities. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
